

CFS COOLANT FILTRATION SYSTEMS

ROLL

DISK

COMB

How much will you save with clean coolant?

Extend machine & coolant life

Longer tool / grinding wheel life

Improve workpiece quality

No settling tank to clean

Reduced machine maintenance

Faster cycle times

Fully automatic

High quality, low price

Over 30 standard models available

"We purchased CFS Coolant Filter Model C7.15 from ITA, Inc. and we are very satisfied with its performance. We find it to be of good quality, designed very well, takes up less floor space than others, and it was the lowest price by far compared to all the other units that we looked at. A lot of bang for the buck."

Gary Cadman

Maintenance Manager
